Diagnostic Cannula and Oxygen Tubing

"Softi" Smoothflow® Diagnostic Cannula (PVC)

- Can be used in conjunction with pressure transducers or thermistors in Polysomnography (Sleep Studies)
- Optimizes pressure/snore waveform signals
- Inexpensive
- Contoured "Softi" Smoothflow® cannula provides total patient comfort
- Over the ear fit secures position on the patient
- Available in various lengths
- Male luer lock connection

Part No.	Size	Length	Connection
LD50ML61	Adult	50cm	Male Luer
LD50ML63	Paediatric	50cm	Male Luer

LD130ML61	Adult	130cm	Male Luer
LD130ML63	Paediatric	130cm	Male Luer

Non-Kink Star Lumen Disposable Oxygen Tubing (PVC)

- Kink resistant tubing with inner star lumen design
- Flexible PVC tubing with standard connectors
- Lengths available in 2.1, 3.0, 6.0 and 10.0 metre variations

34502/2.1	2.1m, 6mmM, 4mmF Oxygen Tube
34502/3	3.0m, 6mmM, 4mmF Oxygen Tube
34502/3GR	3.0m, 6mmM, 4mmF Green Oxygen Tube
34502/6	6.0m, 6mmM, 4mmF Oxygen Tube
34502/10	10.0m, 6mmM, 4mmF Oxygen Tube
34502/10GW	10.0m, 6mmM, 4mmF Green Oxygen Tube, White Cuffs
34502/15GW	15.0m, 6mmM, 4mmF Green Oxygen Tube, White Cuffs

Other Lengths Available By Request

PVC Tubing "Star Lumen" (PVC)

COT6N220100-30 Star Lumen PVC Tubing
2.2mm OD x 1mm ID, (30m Roll) - for use with CO₂

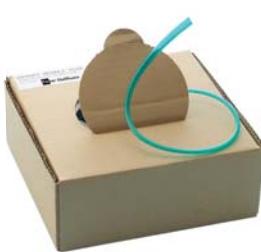

OT6N610405-30 Star Lumen PVC Tubing
6.1mm OD x 4.05mm ID, (30m Roll) - for use with Oxygen

PVC Tubing "Smooth Wall" (PVC)

NTN315185-30 Cannula PVC Tubing
3.15mm OD x 1.85mm ID, (30m Roll) - for use with CO₂

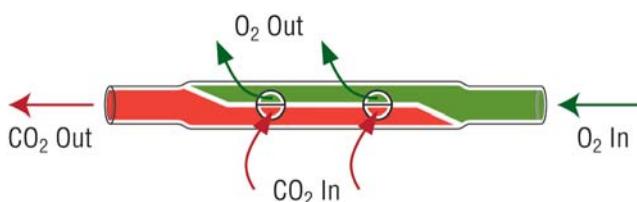

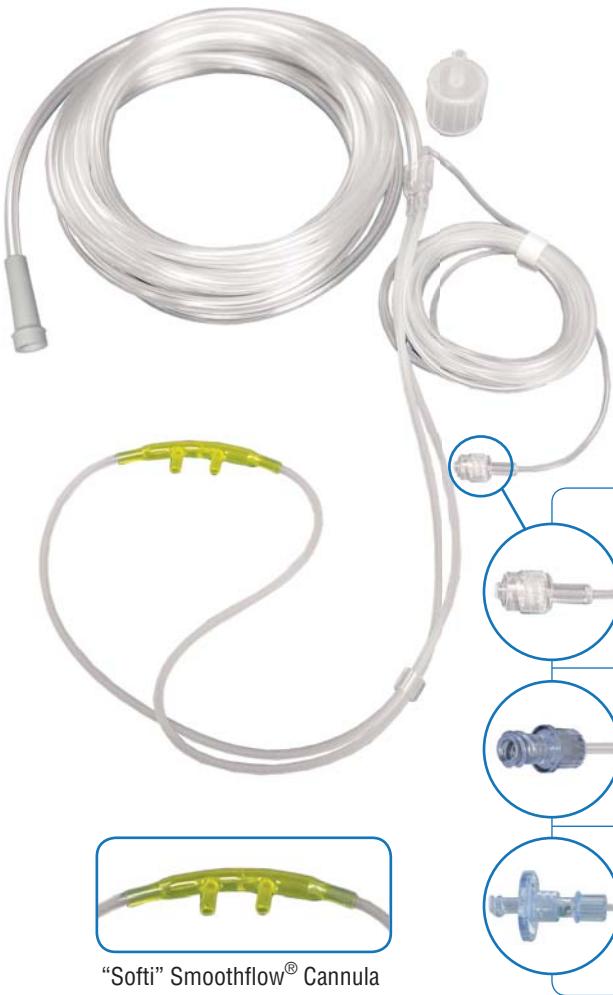

OTN610405-30 "Smooth Wall" PVC Tubing
6.1mm OD x 4.05mm ID, (30m Roll) - for use with Oxygen

Flexible Oxygen Bubble Tubing (PVC)

- Flexible oxygen bubble tubing
- Available in 30 metre rolls
- Can be cut to any length as required
- Fits multiple oxygen therapy devices and connectors

OBTG-3-30 Oxygen Bubble Tubing
3.0 mm ID, Bubble every 90cm, (30m per roll)

The "DuoFlow" design for Oxygen / CO₂ Sampling

Intelligently designed, the DuoFlow cannula allows delivery of oxygen and sampling of expired CO₂ gases from both nares simultaneously.

The DuoFlow cannula is currently available in 2 designs, Standard and Mouthpiece style.

"DuoFlow" Oxygen / CO₂ Nasal Sampling Cannula (PVC)(PC)(PP)

- Contoured cannula provides total patient comfort
- The design allows delivery of oxygen and sampling of expired CO₂ gases from both nares simultaneously
- Kink resistant tubing with inner star lumen design
- Over the ear lit secures position on the patient

Part No.	Cannula Size	Tube Length
MP6500	Adult	2.1 metre

Oxygen Connection = Oxygen Cuff
CO₂ Connection = Male Luer

Legend: (D) = Disposable ID = Inside Diameter (PVC) = Polyvinyl Chloride (PP) = Polypropylene (PC) = Polycarbonate

"DuoFlow" Adult/Paediatric Oxygen / CO₂ Sampling Cannula with Mouthpiece (PVC)(PC)(PP)

- Mouthpiece to help capture patient's CO₂ gases orally
- Contoured cannula provides total patient comfort
- The design allows delivery of oxygen and sampling of expired CO₂ gases from both nares simultaneously
- Kink resistant tubing with inner star lumen design
- Over the ear lit secures position on the patient

Part No. *Cannula Size* *Tube Length*

MP6000 Adult / Paed. 2.1 metre

Oxygen Connection = Oxygen Cuff

CO₂ Connection = Male Luer

Emergency CO₂ Nasal Cannula (PVC)

- Permits easy and simple EtCO₂ sampling
- Single prong inserts into one nares
- Minimum impact on patient's breathing pattern
- Ideally suited for emergency and transport situations

Part No. *Cannula Size* *Tube Length*

PHC02-1000 Adult / Paed. 2.1 metre

Adult Capnography & CO₂ Monitoring Mask with CO₂ Luer Lock Port and 6mm Oxygen tube connector

- Contoured Therapy Mask provides total patient comfort
- Luer Lock port for CO₂ measurement
- 6mm Oxygen tube connector
- Transparent mask material
- Nose clip

MP4200 Adult Capnography& CO₂ Mask

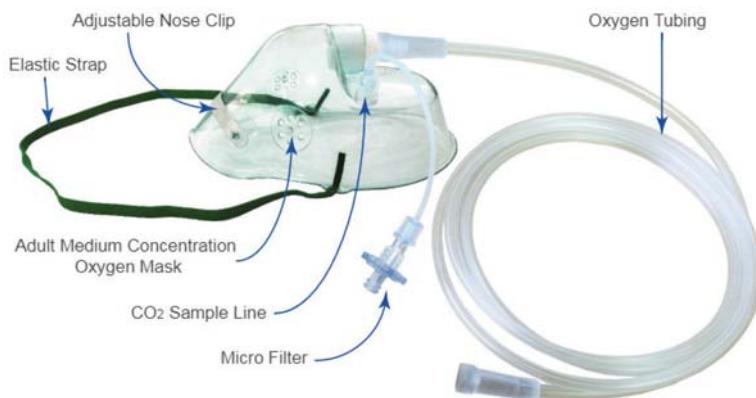

Legend: M = Male (External) F = Female (Internal) (D) = Disposable ID = Inside Diameter (PVC) = Polyvinyl Chloride

CO₂ Line Filter

Adult Capnography & CO₂ Monitoring Mask with CO₂ Line Filter & 3.0m Star Lumen Oxygen Tubing

- Contoured Therapy Mask provides total patient comfort
- Luer Lock connection for CO₂ measurement
- Transparent Mask material
- Star Lumen Oxygen Tubing
- Nose Clip

MP48006-F3 Adult Capnography and CO₂ Mask with CO₂ Line Filter and 3m x Star Lumen Oxygen Tubing.

CO₂ Sample Lines with Inner “Star Lumen” Design (PVC)(PC)

Male to Female Luer Connection

- MP0300** 3.0 m (10ft.) CO₂ Sample Line M/F Luer connection
MP0315 4.5 m (15ft.) CO₂ Sample Line M/F Luer connection
MP0330 9.0 m (30ft.) CO₂ Sample Line M/F Luer connection

Male to Male Luer Connection

- MP0500** 3.0 m (10ft.) CO₂ Sample Line M/M Luer connection
MP0515 4.5 m (15ft.) CO₂ Sample Line M/M Luer connection
MP0530 9.0 m (30ft.) CO₂ Sample Line M/M Luer connection

Legend: M = Male (External) F = Female (Internal) (D) = Disposable ID = Inside Diameter (PC) = Polycarbonate (PVC) = Polyvinyl Carbonate

Anaesthesia Gas Sampling Line

Monitoring of gas delivery and expiratory gases can give essential information on a ventilated patient's status. In low-flow anaesthesia in particular, accurate measurement of the inspiratory and expiratory volatile anesthetic concentrations is highly recommended.

The inner PE wall prevents absorption of anesthetic agent into the tube walls, while the flexible PVC layer helps prevent kinks

- PVC / PE Material
- Male / Male Luer connector
- Female / Female Luer connector
- Male / Female Luer connector
- Box quantity of 50

PH-7100-3M	3.0m / 10 ft (OD 3.0mm; ID 1.2mm) Male / Male Luer Lock

OXYGEN THERAPY & RESPIRATORY

BiPAP Breathing Circuits - Disposable

The Disposable BiPAP (BPC72FS & BPC72FS-NPL) Circuit is used in conjunction with a BiPAP (Bi-Level Positive Airway Pressure) Machine. The BiPAP machine provides air at suitable pressure and flow rates for patient ventilation assistance.

BiPAP is intended to augment patient breathing in those patients with spontaneous respirations. It is not to be used as a life support ventilator circuit. The BiPAP circuit is connected to the BiPAP machine and consists of smooth bore tubing, optional pressure line, bacterial / viral filter and exhalation valve / exhaust vent. A mask is attached to the exhalation valve and then attached to the patient.

BiPAP Circuit with External Pressure Line

180cm (72") length Crush and Kink resistant spiral bound tubing with internal smooth bore, pressure line and high efficiency viral / bacterial filter.

BPC72FS BiPAP Circuit with external pressure line

BiPAP Circuit with External Pressure Line, Vented Mask and Headstrap

180cm (72") length Crush and Kink resistant spiral bound tubing with internal smooth bore, pressure line, high efficiency viral / bacterial filter and 810 type vented mask with Polycarbonate frame and headstrap.

BPC72FS-M3PC BiPAP Circuit with External Pressure Line and Size 3 (Small) Vented Mask and Headstrap

BPC72FS-M4PC BiPAP Circuit with External Pressure Line and Size 4 (Medium) Vented Mask and Headstrap

BPC72FS-M5PC BiPAP Circuit with External Pressure Line and Size 5 (Large) Vented Mask and Headstrap

Refer page 99 for individual masks.

"Vented" CPAP Full Face and Nasal Masks

Easy Adjustment for
Correct Forehead Support

Standard Headstrap Included

"Vented" Reusable 'Cirri' Full Face CPAP Masks with Headstrap (PC)(S)

- NEW 3D mask cushion provides an excellent seal without tight headgear and discomfort
- Simple action to attach and detach the cushion from frame
- Quick release clips allow for easy removal of the headgear
- Innovative adjustable forehead support provides one-handed adjustment and stability
- Flexible, one-piece forehead pads evenly conform to the contour of the forehead
- Quiet air vent that minimizes noise and enable efficient CO₂ washout and vented air is spread as a cloud so that it does not disturb patient or companion.

Complete with Standard Headstrap

PH11345 'Cirri' Full Face Mask, Large
Complete with Standard Headstrap

Easy Adjustment for
Correct Forehead Support

"Vented" Reusable 'Cirri' Nasal Face CPAP Masks with Headstrap (PC)(S)

- NEW 3D mask cushion provides an excellent seal without the discomfort of tight headgear
- Simple action to attach and detach the cushion from frame
- Quick release clips allow for easy removal of the headgear
- Innovative adjustable forehead support provides Innovative stability
- Flexible, one-piece forehead pads evenly conform to the contour of the forehead
- Quiet air vent that minimizes noise and enable efficient CO₂ washout and vented air is spread as a cloud so that it does not disturb patient or companion.

PH11353 'Cirri' Nasal Face Mask, Small
Complete with Standard Headstrap

PH11354 'Cirri' Nasal Face Mask, Medium
Complete with Standard Headstrap

PH11355 'Cirri' Nasal Face Mask, Large
Complete with Standard Headstrap

Standard Headstrap Included

Sechrist 3500HL High/Lo Flow Air / Oxygen Mixer

The Sechrist Model 3500HL series Hi/Lo Flow Air-Oxygen Mixer is a precision pressure regulation and proportioning device which is designed to accurately mix Medical Air and Oxygen to any selected FIO₂ between 0.21 and 1.0 for delivery to a variety of respiratory care equipment.

Accuracy*:	±3 % of full scale
Maximum Flow:	100 LPM
FIO ₂ Range:	0.21 +0.1 to 1.0 -0.1
Bleed Flow:	8-10 LPM @ 16 LPM

3600 Model 3500HL with integral pole mounting bracket
(Allows 1 x Oxygen Flow meter to be connected on left port)

3601 Model 3500HL with wall mounting bracket
(Allows 2 x Oxygen Flow meters to be connected - 1 x each side)

Sechrist 3500 Low Flow Air / Oxygen Mixer

Accuracy*:	±3 % of full scale
Maximum Flow:	40 LPM
FIO ₂ Range:	0.21 +0.1 to 1.0 -0.1
Gas Supply Range:	50 psi + 10 psi
Bleed Flow:	2.5 - 4.5 LPM @ 8 LPM

20457-1 provides precise mixing of air and oxygen for clinical wall mount applications while the 20459-1 provides for pole mounting. Both models are low flow mixers designed for low flow general applications.

Standard Accessory:

Water Trap Assembly

Optional Accessory:

0 - 15 LPM Flowmeter

20457-1 Wall Mount Air/Oxygen Mixer

20459-1 Pole Mount Air/Oxygen Mixer

Sechrist 3500 CP-G series Air/Oxygen Flow Controller and Mixer

Accuracy*:	±3 % of full scale
Gas Supply Range:	50 psi + 10 psi
FIO ₂ Range:	0.21 +0.1 to 1.0 -0.1
Bleed Flow:	2.5 - 4.5 LPM @ 8 LPM
Maximum Flow:	40 LPM

Sechrist Air/Oxygen gas mixers model 3500 CP-G provides for precise mixing of air and oxygen for many clinical applications. The Model 3500 CP-G gas mixer is specifically designed for ECMO or heart-lung bypass applications.

Standard Accessories:

0-10 LPM flowmeter, 1000 ml flowmeter

3500 CP-G CP-G series Air/Oxygen Flow Controller and Mixer

*NOTE: Mixers will maintain the delivered FIO₂ within + 1 percentage point of the selected value even with fluctuations in supply pressures. An additional 2% variance may result from the readability of the set point and scale error.

Accessories:

IV308 Air Supply Hose with Shut-off Valve (2.0m)*

IV309 O₂ Hose with Shut-off Valve (2.0m)*

3601/SS0S1 Self-seal Adaptor*

515800 Oxygen Flow meter 15LPM

* Supplied with 3600 & 3601 Blenders

IV308/3 Air Supply Hose (3.0m)

IV309/3 Oxygen Supply Hose (3.0m)

IV308/5 Air Supply Hose (5.0m)

IV309/5 Oxygen Supply Hose (5.0m)

We offer a complete preventative maintenance service that ensures that your device continues to operate as per manufacturer's specifications.

OXYGEN THERAPY & RESPIRATORY

Maxtec Air/Oxygen Blenders and Blender Buddy

MaxBlend2 Oxygen Analyzer & Blender

The NEW Maxblend 2 was designed based upon years of feedback from our customers. We've added numerous features, however still managed to create an easy-to-use, low maintenance blender. New features include a back lit LCD, back lit acrylic flowmeter, smart alarms, DC power port and extended battery life.

- Large, Back Lit LCD
- Smart Alarms
- Long Battery Life
- DC Power Port
- External Max-550 O₂ Sensor
- Acrylic Flowmeter

R229P01-001

MAXBlend2™ L (Low Flow)

15% low to 99% high alarm capabilities, 0-30 LPM flow range

R229P02-001

MAXBlend2™ H (High Flow)

18% low to 99% high alarm capabilities, 2-100 LPM flow range

R140P02

Replacement Sensor

Accessories:

R200P02

Maxblend Preventative Maintenance Kit

We offer a complete preventative maintenance service
that ensures that your device continues to operate as
per manufacturer's specifications.

Blender Buddy for the Maxblend & MAXO2+A

The Blender Buddy turns your blender into the ultimate blending device. Its robust design provides quality and reliability needed to ensure the ultimate patient care. This product securely attaches to your blender using a specific independent block to ensure that it doesn't swivel or move inadvertently. The oxygen port on the top of the manifold allows gas to be analysed in a clean and dry environment away from the patient to avoid cross-contamination.

- Robust blender extension for 2 flowmeters
- Includes an analyzer port for accurate fIO₂ readings
- Comes standard with a low-flow and high-flow flowmeter (0-3.0 & 0-15 LPM)
- Compatible with multiple blenders

- not included in R219P11

OXYGEN THERAPY & RESPIRATORY

Air/Oxygen Blender and MaxVenturi

Blender w/ Blender Buddy

Blender w/ Blender Buddy &
additional MaxO2+A Analyser

We offer a complete preventative maintenance service
that ensures that your device continues to operate as
per manufacturer's specifications.

MicroMax™ Air/O₂ Blender

The MicroMax™ MicroBlenders features delivery of accurate FiO₂ mixtures from two outlet ports and has an overall flow range of 15-120 LPM (High Flow) and 3-3 LPM (Low Flow). Maximum combined flows are greater than or equal to 120 LPM (High Flow) and 30 LPM (Low Flow). When equipped with the Maxtec Blender Buddy, the MicroMax provides users with a complete mixing package complete with a blender, two flowmeters and an oxygen analyzer (sold separately).

- High Flow and Low Flow Models
- Unique, Durable and Versatile
- ON/OFF Bleed Control
- Includes Universal Mounting Bracket
- Durable ABS Housing
- Available with Blender Buddy (*Contains a 0-3 LPM & 0-15 LPM flowmeter*)

MaxVenturi®

The MaxVenturi® has been specially designed to interface with high flow humidification systems. Using the well established venturi principle, this unit provides users with the ability to mix ambient air and oxygen without the need for piped medical grade air. This is the perfect solution for adult high flow therapy in almost any environment.

- Provides users with the ability to mix ambient air and oxygen without the need for piped medical air
- All-in-one oxygen/air mixer, MaxO2+ analyzer and flowmeter
- Long battery life on analyzer (approximately 5,000 hours)
- Independent adjustable O₂% and flow
- Built-in pole clamp
- Ease in titration
- Two year O₂ sensor warranty

UPDATED APPLICATIONS:

- High flow therapy for trach patients
- Compatible with common aerosol mask applications
- Alternative conventional mixed gas delivery while moving entrainment away from patient

Handi®+ Disposable Analyser & Sensor

The Handi+ is everything it's always been and more! Maxtec has improved the Handi O₂ analyzer to better meet your needs for oxygen analysis. The simple to use, one-touch calibration button, new overmold and calibration reminder, auto-off and size make it the best of its class. This analyzer is great for spot-checking O₂ percentage in hospitals, clinics and in homecare environments.

- New and improved one-touch calibration button
- Overmold for extra protection
- Small, convenient and portable
- Auto-off

R218P12-005 Disposable Analyser & Sensor

MAXO2+ A Oxygen Analyser (with internal sensor)

The MAXO2+A was designed with simplicity and portability in mind. This analyzer is ideal for checking oxygen percent accuracy in concentrators.

- Internal MAX-250+ Long Life Sensor
- 5,000+ hours operation on 2 AA batteries
- Easy one touch calibration
- Patented ergonomic design fits comfortably in your hand
- Quickly adapts to bore tube applications

R217P62-004 Oxygen Analyser (with internal sensor)

R125P02-011 Replacement Oxygen Sensor

MAXO2+® AE Oxygen Analyser (with external sensor)

The MAXO2+AE is best used anywhere an in-line analyzer is needed, when alarms are not deemed important. It is especially useful in conjunction with older ventilators or oscillators.

- 5,000+ hours operation on 2 AA batteries
- Easy one touch calibration
- Patented ergonomic design fits comfortably in your hand

R217P72 Oxygen Analyser (with external sensor)

R125P03-002 Replacement Oxygen Sensor

MAXO₂[®] Oxygen Monitor

The NEW MaxO2ME was designed based upon years of feedback from our customers. We've added numerous features, however still managed to create an easy-to-use, low maintenance monitor. New features include a back lit LCD, smart alarms, DC power port, protective over-mold, built in kickstand, built in dove tail and extended battery life.

- 24 month warranty on both the analyzer and the sensor
- Large, Back Lit LCD
- Smart Alarms - auto set alarms 3% +/- current reading
- Long Battery Life - Up to 5,000 hours on 4 x AA batteries
- DC Power Port, for use with optional remote power supply
- External Max-550 O₂ Sensor
- Built in Kickstand and Dove Tail
- Adjustable Alarms from 15% to 99%

R230P01-001 Maxtec Oxygen Monitor

R140P02 Replacement Oxygen Sensor

UltraMaxO2 Oxygen Analyser for Oxygen Concentrators

The UltraMaxO2 was designed for fast and easy verification of oxygen concentration, flow and outlet pressure of oxygen concentrators. Best of all, the UltraMaxO2 provides unparalleled performance and reliability from its advanced design that includes the following features and operational benefits:

- Accurately measure O₂, flow and pressure
- No oxygen sensor required
- No in-field calibration
- Self-diagnostics
- Shielded, reinforced sample gas inlet port
- Includes silicone case for increased durability

R221P11-001 UltraMaxO2 Oxygen Analyser

NOTE: Only to be used for analysis of Oxygen Concentrators

MaxFLO₂ Mini Air / Oxygen Mixer

The all-new MaxFLO₂ mini from Maxtec is an affordable method for mixing and monitoring air and oxygen. The MaxFLO₂ mini is available with multiple flowmeter configurations for use in different applications. Each unit comes equipped with dual flowmeters and includes a pole clamp for easy transportation and storage.

- Flow and FiO₂ control all in one
- Multiple flowmeter configurations available
- Pole mount included for easy transport or storage
- Quiet operation for minimal patient stimulation
- Ownership is considerably lower than cost of blenders and blender maintenance
- 24 month warranty

Perflow High Precision Flowmeter

High precision flowmeter with pre-calibrated flows. The “click-style” positioning is accurate and prevents accidental flow changes. Pressure stabilised, micro regulator ensures flow accuracy in the event of changes to supply pressure.

- Compact & Robust
- Works at ANY angle
- Models available to suit a wide range
- No more expensive glass tube repairs
- No more “Guessing” of flow rates
- Allows fine titration of flows

1600 Series Dial Regulator
(Yoke Style 168708D shown)

Available Gauge Colours

The Easy Dial Reg family can be ordered with any one of six (6) different color gauge protectors, green being our standard. When ordering, please remember to add a dash (-) between the regulator part number and the desired color suffix. (Eg. 168708D-Y).

Easy Dial Regulator / Flowmeter

The world's most compact and convenient dial regulator from Precision Medical.

The Easy/Dial Reg is only 108mm long and weighs a mere (220gm) as a result of the offset gauge and the new multi-spring technology. The unit's easily accessible flow adjustment knob is large and knurled making flow adjustment a cinch even for the physically challenged.

The Easy/Dial Reg features a built-in pressure relief, as well as a protected contents gauge. The low force Viton® yoke seal provides a better reg-to-tank seal. Unique design minimizes normal flow variation that occurs as tank pressure drops. Comes in two body designs, yoke or nut style and is available in five flow ranges: 31-4000cc, 0.03-4 LPM, 0.25-8 LPM, 0.50-15 LPM and 0.25-25 LPM.

Yoke Style (870)	Specifications Flow Rate	Position Increments (LPM)
168708D	0-8 LPM	Off, .25, .50, 1, 1.5, 2, 2.5, 3, 4, 5, 6, 8
168715D	0-15 LPM	Off, .50, 1, 1.5, 2, 3, 4, 5, 6, 8, 10, 15
168725D	0-25 LPM	Off, .25, .50, 1, 2, 3, 4, 6, 8, 10, 15, 25

Accuracy: ±10% of indicated setting @ 70°F (21°C)
 Transport / Storage Temperature Range: -4°F (-20°C) to 140°F (60°C)
 Inlet Pressure Range: 300 - 3000 psi (2068 - 20684 kPa)
 Ignition and Fault Tolerance: Meets ASTM G175-03

Oxygen Conserving Regulator

- Helps Reduce Oxygen Costs
- Controls Minute Volume
- Reliable, Versatile, Compact, Lightweight & Clinically Sound

Vacusill® 3 Suction Regulators

Vacusill 3 is a medical suction device made of Aluminium (body), Polycarbonate (scale) and Polysulfone (water trap). Powered by a vacuum source it has 3 possible operating modes.

1. CONT or REG - Continuous suction permanently regulated.
2. LINE - Through a by-pass, it will override the regulator operation, reaching, if requested, the maximum pipeline pressure.
3. INT - Regulated intermittent suction. The standard (OFF/CONT) frequency 2:3 can be adjusted.

5341000 Paediatric Continuous Intermittent Vacuum Regulator c/w Gauge, Fast ON-OFF Switch and Handwheel 0 to -150 mmHg (0 to -20 kPa)

5342000 Continuous Intermittent Vacuum Regulator c/w Gauge, Fast ON-OFF Switch and Handwheel 0 to -200 mmHg (0 to -26 kPa)

Suction Filter Kits

SF2000 Suction Filter (with colour change)

The SF2000 is a disposable suction filter replacing the common sintered bronze style currently used in all Comweld and Clements suction attachments. Its ability to change colour when in contact with fluid ensures a clear visual indication of a contaminated filter.

- REPLACES WA185 FILTER
- Suits Comweld (C.I.G.) and Clements suction attachments
- Visual indication of contamination
- Economical replacement
- Easy to change
- Time-saving
- Disposable - NO CLEANING

SF2000 Suction Filter (Packet of 20) (HDPE)

FILTER TURNS BLUE WHEN CONTAMINATED

Suction Filter Housing (Disposable)

- REPLACES ORIGINAL HOUSING
- Available for Comweld & Clements suction attachments
- Made from Easy-view clear material
- Economical replacement

Entonox Analgesic Administration System

The system is a rugged demand inhalation unit for the administration of 50% Nitrous Oxide / 50% Oxygen analgesic gas mixture (Entonox). The system is ideal for the relief of pain in a wide range of situations.

- Transport of accident victims
- Casualty areas
- Minor surgical procedures
- Coronary care units with standard ventilators
- Obstetric analgesia

PH550010 Entonox Analgesia Administration System

Consisting of:

Series-O-Entonox Regulator, Bleed Pin,
 2m Hose Assembly, Demand Valve & Mask

302920 Black Wingscrew for Medical Yoke Regulator

A keywheel or spanner design product to turn medical gas cylinders on and off

Bodok Seals

551022 Bodok Seal (Packet of 10)

Suits Series-O regulators or any equipment with pin indexed yoke inlet fittings for medical gas cylinders.

Oxy-Viva 3 Resuscitator with Demand Valve

- Simple, rugged and highly portable in a stainless steel case
- Storage compartment stores and protects your components
- Simple design and easily serviceable
- Oxygen demand valve Resuscitator provides a resuscitation flowrate of 40-60 l/min and a demand flowrate of 0-160 l/min
- Suction attachment provides a static vacuum of -60kPa (-450mmHg) and a suction flow of 40 l/min free air minimum with a 250ml trap jar and a nipple to suit 8mm suction tubing
- Pin indexed yoke gas inlet connection as well as an auxiliary inlet/outlet low pressure O₂ connection
- Therapy flow attachment offering a fixed flowrate of 8 l/min with an on/off lever and nipple to suit 5mm therapy tubing

Applications:

The Oxy-viva 3 Resuscitator provides the benefits of resuscitation, suction and oxygen therapy all in the one compact unit. Operating off a 400 litre (C-size) oxygen cylinder, these 3 different treatment modes can be used simultaneously or separately for almost any emergency situation. The Oxy-Viva 3 contains equipment to suit an enhanced level of resuscitation training. The system gives you increased flexibility with a gas powered oxygen demand valve resuscitator, a suction attachment with collection jar, a fixed flow oxygen therapy attachment and auxiliary inlet/outlet connection.
